

SIKANDER MUKHTAR

Lahore | +923364627869 | sikandarmukhtar5@gmail.com | [GitHub](#) | [LinkedIn](#) | [Hugging Face](#)

EDUCATION

COMSATS University Islamabad, Lahore Campus

Bachelor of Sciences in Computer Science

CGPA: 3.32

Sept 2022 – Jul 2026

Relevant Course: Object-Oriented Programming, Data Structures and Algorithms, Database Systems, Software Engineering Concepts, Design and Analysis of Algorithms

TECHNICAL SKILLS

Languages: Python, JavaScript, Golang

Frameworks & Libraries: ReactJS, FastAPI, PyTorch, Sklearn, LangChain, MCP

Databases: PostgreSQL, Supabase, NeonDB

Developer Tools: Git and GitHub

AI Tools: Claude Code, Antigravity, Open Code

WORK EXPERIENCE

Digimark Developers

July 2025 – April 2026

AI/ML Engineer

- Trained and evaluated classification models for sentiment analysis, image classification problems.
- Designed and tested N8N automations.
- Communicated with clients and engineered effective workflows.
- Worked with Twilio and VAPI SDKs.

PROJECTS

Load Balancer [\[GitHub\]](#)

Http Reverse Proxy | Go, Docker

- Developed a Go-based HTTP reverse proxy load balancer with modular strategy support for Round Robin, Random, IP Hash, Least Connections, and Weighted Round Robin algorithms.
- Implemented concurrent backend health checks to route traffic only to available services and return graceful errors when no healthy backend exists.

Urdu Poetry Author Attribution

Sklearn | Hugging Face | PyTorch

- Trained classical machine learning models and deep learning models like for Urdu Author Attribution task, 15 authors (labels) and 17609 training samples.
- Performed explanatory data analysis.
- Utilized character level and word level ngrams (TF-IDF) to train Logistic Regression, Support Vector Classifier, Random Forest Classifier, XGBoost Classifier.
- Fine-tuned XLM-RoBERTa and mBERT, tokenized Urdu training samples using their tokenizers.
- Evaluation metrics included accuracy, precision, recall, and confusion matrixes.

Handwritten Urdu Text Recognition using VLMs

Hugging Face | PyTorch | LlamaFactory | Weights & Biases | BitsAndBytes

- Developed an evaluation benchmark for full-page handwritten Urdu text, consisting of 70 images produced by 7 unique writers.
- Performed comparative analysis on Gemini-3.1-flash-lite-preview, Qwen3.6-Plus, Chandra-OCR-2, Gemma-3-4B-IT, GPT-4o, GPT-5-mini.
- Gemini performed almost perfectly for such a complex task, using Gemini to create pseudo labels for unlabeled handwritten Urdu pages.
- Used QLoRA to fine-tune Gemma-3-4B-IT via knowledge distillation from Gemini using LLaMA-Factory.
- Used Character Error Rate (CER), Word Error Rate (WER), Precision, Recall and F1 as evaluation metrics.

Bookstore [\[GitHub\]](#)

Bookstore API | FastAPI, NeonDB, Alembic

- Bookstore API with Search, Authentication, and File Upload, for managing a simple bookstore inventory. The API allows authenticated users to manage books, search for them, and upload a CSV file to bulk-insert books.

Blogging Platform [\[GitHub\]](#)

Blog platform API | FastAPI, NeonDB, Alembic

- Blog platform API with JWT authentication and authorization, role-based access, PostgreSQL and SQLite support, and Alembic migrations.

Social Network App Database

Database systems semester project | MySQL, Python

- Designed and implemented a comprehensive database schema for a social network application, supporting features such as user profiles, friendships, posts, likes, comments, groups, notifications, messaging.
- Developed over 15 relational database tables using SQL, ensuring proper normalization, management of one-to-one, one-to-many, many-to-many relationships, and wrote procedures and reports for querying.

Adidas Clone

Ecommerce Web app | ReactJS, Next JS, FastAPI

- Built e-commerce backend using microservices architecture, and FastAPI.
- Built with Next.js with dynamic pages for products, carts, and user authentication.

EXTRACURRICULAR ACTIVITIES

Web development Hackathon, Devathon by Devsinc – Sept 2024

Team lead | Worked alongside my team members to develop the project in 6 hours.

- Developed a web-based patient management system to streamline the management of patient information, appointments and medical records. Demonstrated teamwork and problem solving under time constraints.
